

IAN RACKSON

Full Stack Website Developer

New York, NY / nasirus@protonmail.com / 917-684-8443 / [Portfolio & Blog](#)

SUMMARY

I'm a full-stack web developer looking to work independently or preferably together with others to build a web app for a business in need. I help companies and clients create a unique online experience for customers by putting my design and coding skills to the test. My main motivation is producing top quality websites that align with my partners' goals. The value that I offer is twofold: I'm the rare double threat. Not only can I code well across a full stack, but my background in graphic design drives a passion and skill for making the front-end look great.

FULL-STACK SKILLS

Front-End: HTML, CSS & SASS, Firebase, React, Bootstrap,

Back-End: JavaScript, TypeScript, Python, Node (Express, MongoDB, Next)

Other: Bash, Linting, Testing (Jest, Jasmine)
